

Dear Patient,

Thank you for taking the time to fill out the following New Patient Information Form prior to your first visit. **It is our office policy that you must return your completed and signed New Patient Information Form to our office before we will schedule your first appointment. To return your form, you may email (info@drpeine.com), mail, fax (208-947-0926), or drop it off at the office.** Upon receiving your paperwork, we will call to schedule your appointment. We require your completed paperwork be returned ahead of time to make your time with the physician more efficient and productive.

Please bring the following with you to your initial appointment:

- A copy of any blood (lab) work that has been done in the past year, as well as any reports from relevant past imaging studies (x-rays, MRI, CT scans, etc). It is not necessary for you to bring copies of your films to your initial visit. Your doctor's office may fax this information directly to us at (208) 947-0926.
- Your insurance card, or a copy of the front and back of your insurance card.
- Credit card, check or cash for your insurance copayment, coinsurance, or deductible. Please be punctual in order to benefit fully from your appointment. **There will be a \$100 no-show fee assessed if cancellation is not made at least 24 hours prior to your appointment.**

We accept most forms of insurance with the exception of Regence Blue Shield of Idaho, Health Shares, Medicaid, and Medicare. Please contact your insurance or the office to verify benefits and coverage prior to scheduling an appointment. If you have an insurance which we do not accept, we offer a discount for cash payment made at the time of service. If we are an out-of-network provider for your insurance, we will provide you with a bill you may submit to your insurance. If you have a question about your bill, please contact the office.

Our office address is 2717 West Bannock Street, Suite 101, Boise, Idaho 83702. We are located two blocks from Whittier Elementary School and four blocks from Quinn's Pond. From Highway 184 E (the Connector), take Fairview Avenue Exit 3 and follow the off ramp under the highway. Continue on Fairview Avenue, crossing over the river. Turn left onto 27th street. Drive two blocks and turn left onto Bannock Street. Our office is in the second free-standing building on your left. Please call with any questions or for help finding our new location.

Please feel free to contact us at (208) 947-0925 if you have any questions or concerns.

Sincerely,

Chris Peine, D.O.
Peter Abraham, D.O.
Benjamin Prinzing, N.P.

LOW DOSE IMMUNOTHERAPY INFORMATION AND INFORMED CONSENT

Low Dose Immunotherapy (LDI) is a treatment for increasing immune “tolerance” of an overactive immune system. Allergy and autoimmunity represent an alteration or overactivation of appropriate immune tolerance. LDI retrains the immune system for specific antigens, thereby decreasing overactive immune response and decreasing symptoms.

This type of immunotherapy was discovered in Great Britain in the 1970s and called “Enzyme Potentiated Desensitization” (EPD). The technique utilized very small concentrations of antigens along with an enzyme, beta glucuronidase, which helps educate the T cells involved in the immune response. This treatment was brought to the US, but in the early 1990s the FDA stopped the importation of EPD. At this point, Dr. Shrader reproduced the mixtures of EPD and called them LDA. LDA originally used antigens causing certain allergies and the technique was later expanded by Dr. Vincent to treat various autoimmune conditions using a variety of different antigens, called LDI.

LDI is not approved by the Federal Drug Administration (FDA), just like vitamins and other herbal supplements. LDI is currently classified as experimental treatments and as such, we do not bill for antigen mixtures, only our time and supplies.

PROCEDURE

Patients will first undergo a history and physical to determine if LDI is an appropriate therapeutic technique. Often lab work will be done prior to LDI therapy to help guide therapy. LDI doses are given by administering a small drop (less than 1 ml) of the antigen mixture under the tongue. Doses are typically repeated every 7 weeks, as needed, but “booster” doses can be given as soon as 2 weeks, based on response to the first dose. If you wish to pick up a dose of LDI, our office requires a 24-hour notification. We will not call to notify you when it is ready; you may simply come to the office and pick it up.

DOSE REPORTING

For accurate dosing, please record the following information after your dose to report to Dr. Abraham or Benjamin Prinzing at your next visit or through the Patient Portal two weeks after dose.

1. LDI mixture and date administered
2. Change in symptoms from baseline symptoms and specific symptoms
3. Duration of symptom change

AVAILABLE ALTERNATIVES

I am aware of various alternatives to treat my condition(s). Alternatives may include: pharmaceuticals to treat condition; vitamins and supplements to treat condition; dietary and lifestyle modifications to improve condition; interventional procedures such as IV therapy or steroid injections, or electing to do nothing to treat my condition.

(continued)

LOW DOSE IMMUNOTHERAPY INFORMATION AND INFORMED CONSENT (CONTINUED)

POTENTIAL RISKS (SIDE EFFECTS) AND BENEFITS

There is a risk of a flare in your symptoms for 1 day or more after LDI treatment. Often, if a patient gets a flare of their symptoms with an LDI, the flare will become less with each subsequent treatment. If a patient experiences a flare with LDI, it means we have chosen the correct antigen, but the dose is too high (this is a good thing!!!). If a symptom flare becomes too much to handle, a course of Prednisone can be prescribed to alleviate symptoms.

You may benefit significantly from LDI treatments. Possible benefits include: total relief of your symptoms; partial relief of your symptoms, or reduction or elimination of previous medications used to treat your symptoms.

PREGNANCY

LDI is generally regarded as “safe” during pregnancy. However, LDI has not been extensively studied in pregnancy and so the effects on pregnancy are unknown. As such, it is your choice to continue LDI during pregnancy.

COSTS

LDI is not FDA approved and is not covered by medical insurance. Your provider visit can be billed to insurance; however, you will be required to pay for the cost of the LDI therapy received at the time of service. The cost for each dose is \$40. If you have requested an LDI be drawn by the office and you are picking it up, we require a credit card be on file that will automatically be charged once you make the request. We only ship outside of Ada County and will charge the current shipping and handling rate.

DISCONTINUATION OF TREATMENT

I am free to discontinue treatment at any time, without prejudice, or when I feel I no longer require LDI therapy.

INFORMED CONSENT REGARDING NUTRITIONAL SUPPLEMENT AND FUNCTIONAL MEDICINE LABORATORY TESTING

According to the Federal Food, Drug, and Cosmetic Act, as amended, Section 201(g)(1), the term drug is defined as an “article intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease.” Technically, vitamins, minerals, trace elements, amino acids, herbs, or homeopathic remedies are not classified as drugs. However, these substances can have significant effects on physiology and must be used rationally. In this office, we provide nutritional counseling and make individualized recommendations regarding use of these substances in order to upgrade the quality of foods in a patient’s diet and to supply nutrition to support the physiological and biomechanical processes of the human body. Although these products may also be suggested with a specific therapeutic purpose in mind, their use is chiefly designed to support given aspects of metabolic function. Use of nutritional supplements may be safely recommended for patients already using pharmaceutical medications (drugs), but some potentially harmful interactions may occur. For this reason, it is important to keep all of your healthcare providers fully informed about all medications and nutritional supplements, herbs, or hormones you may be taking.

You are under no obligation to purchase nutritional supplements at our clinic.

As a service to you, we make nutritional supplements available in our office. We purchase these products only from manufacturers who have gained our confidence through considerable research and experience. We determine quality by considering: (1) the quality of science behind the product; (2) the quality of the ingredients themselves; (3) the quality of the manufacturing process; and (4) the synergism among product components. The brands of supplements that we carry in our facility are those that meet our high standards and tend to produce predictable results.

While these supplements may come at a higher financial cost than those found on the shelves of pharmacies or health food stores, the value must also include assurance of their purity, quality, bioavailability (ability to be properly absorbed and utilized by the body), and effectiveness. The chief reason we make these products available is to ensure quality. You are not guaranteed the same level of quality when you purchase your supplements from the general marketplace. We are not suggesting that such products have no value; however, given the lack of stringent testing requirements for dietary supplements, product quality varies widely.

The purpose of functional medicine laboratory testing in our office is to evaluate nutritional, biochemical, or physiological imbalance and to determine any need for medical referral. These lab tests in our office are not intended to diagnose disease. This office utilizes conventional lab tests as well as functional medicine assessment.

Functional medicine assessment is designed to assist our doctors and other healthcare providers in finding the underlying causes of your condition. Functional medicine has evolved through the efforts of scientists and clinicians from the fields of clinical nutrition, molecular biology, biochemistry, physiology, conventional medicine, and a wide array of scientific disciplines. Functional medicine evaluates the body as a whole, with special attention to the relationship of one body system to another and the nutrient imbalances and toxic overload that may adversely affect these relationships.

Your medical physician may or may not agree with the necessity for—or our interpretation of—these tests. If you have any questions or concerns, please discuss them with our doctors.

My signature acknowledges I have read and understand the above.

PROVIDER NOTICE OF PRIVACY PRACTICES

In accordance with federal law, this notice describes how medical information about you may be used and disclosed and how you can get access to this information. Please review it carefully.

USES AND DISCLOSURES

We use health information about you for treatment, to obtain payment for treatment, for administrative purposes, and to evaluate the quality of care that you receive. Continuity of care is part of treatment and your records may be shared with other providers to whom you are referred. Information may be shared by paper mail, electronic mail, fax, or other methods. We may use or disclose identifiable health information about you with your authorization in several situations, but beyond those situations, we will ask for your written authorization before using or disclosing any identifiable health information about you.

YOUR RIGHTS

In most cases, you have the right to look at or get a copy of health information about you. If you request copies, we will charge you only normal photocopy fees. You also have the right to receive a list of certain types of disclosures of your information that we made. If you believe that information in your record is incorrect, you have the right to request that we correct the existing information.

OUR LEGAL DUTY

We are required by law to protect the privacy of your information, provide this notice about our information practices, follow the information practices that are described in this notice, and seek your acknowledgment of receipt of this notice. Before we make a significant change in our policies, we will change our notice and post the new notice in the waiting area.

PATIENT RIGHTS

You can also request a copy of our notice at any time. For more information about our privacy practices, contact Peine Osteopathic Medicine PLLC. Complaints: If you are concerned that we have violated your privacy rights, or you disagree with a decision we made about access to your records, you may contact Peine Osteopathic Medicine, PLLC. You may also send a written complaint to the U.S. Department of Health and Human Services.

I acknowledge I have read and understand the above Notice of Privacy Practices:

MEDICAL QUESTIONNAIRE

Our ability to draw effective conclusions about your present state of health and how to improve it depends, to a significant extent, on your ability to respond thoughtfully and accurately to these written questions. Health issues are usually influenced by many factors. Accurately assessing all the factors and comprehensively managing them is the best way to deal with these health challenges. Your careful consideration of each of the following questions will enhance our efficiency and will provide for more effective use of your scheduled consultation time. These questions will help to identify underlying causes of illness and will help us formulate a treatment plan.

COMPLAINTS/CONCERNS

What do you hope to achieve in your visit with us? _____

When was the last time you felt healthy? _____

Did something trigger your change in health? _____

What makes you feel worse? _____

What makes you feel better? _____

What is your current age? _____

MEDICAL QUESTIONNAIRE (CONTINUED)

ALLERGIES None

Please list any allergies to medications, supplements, or foods. Environmental allergies such as dust or pollen are unnecessary.

MEDICATION/FOOD/SUPPLEMENT	REACTION

MEDICATIONS None

Please include non-prescription medications.

MEDICATION NAME	DATE STARTED	DOSAGE/FREQUENCY TAKEN

NUTRITIONAL SUPPLEMENTS None

List all vitamins, minerals, and other nutritional supplements that you are taking now. Indicate dosage in mg or IU and the form (e.g., calcium carbonate vs. calcium lactate) when possible.

SUPPLEMENT NAME	DATE STARTED	DOSAGE/FREQUENCY TAKEN

MEDICAL HISTORY

Please carefully review the following list and indicate any conditions that apply to you: in the **past (mark with a P)** or if it is an issue for you **currently (mark with a C)**. Please record any other pertinent information in the comments section, and feel free to attach any documents, lab results, notes, etc. that are relevant.
